

VIOBIN®

U.S.A.

A Division of McShares, Inc.

**Statement Pertaining to
GENETICALLY MODIFIED ORGANISMS**

Genetically modified wheat is not commercially available in the United States or Canada where VIOBIN USA sources the wheat germ it processes. Therefore, with the exception of Defatted Wheat Germ No. 2 and VCR, no genetically modified organisms are used to produce VIOBIN Defatted Wheat Germ and VIOBIN Wheat Germ Oil.

Due to the addition of corn syrup solids to Defatted Wheat Germ No. 2 and VCR Viobin does not certify these products as GMO free. Manufacture of these products is carefully controlled to prevent contamination of other wheat germ products to the extent that no labeling of those products is required per EC 1829/2003 an 1830/2003.
